# AT-HOME EV CHARGING DESIGNED TO LOOK AFTER THE GRID.

## LET'S GET YOU PLUGGED IN AT HOME.

We're all about grid-conscious EV charging that is fairly priced and smarter than the rest.

### LOOKING AFTER THE GRID..... AND EACH OTHER.

Charge your EV as and how you want to. Avoid the expensive electrical upgrades, monitor your property's power limits, flex in harmony with local limits, and take advantage of cheaper, cleaner energy sources.

We think that's rather worldly, don't you?

### CUSTOMISABLE AND SMART..... SO YOU CAN DO YOU.

Our premium-quality residential chargers are highly customisable and smart. Staying awhile? Schedule your charge when power consumption is the cheapest. A quick stop? Set a priority charging status and monitor when you're road-ready.

## SELECT, CONFIGURE, AND INSTALL

### THUNDERGRID CHARGERS ARE:

- World-leading smart charge technology
- Connect your charger to any smart device via Wi-Fi/Bluetooth
- Up to 22kw of charging capacity
- Schedule & monitor your charging from the app
- Dynamic LED light indicator showing charge status at a glance
- All-weather materials with a 3-year warranty

### WHAT IS DYNAMIC LOAD MANAGEMENT?

- A load guard sensor is installed on your home's fuse board
- It controls modulate power according to local availability and demand
- Your EV will remain in harmony with the entire load of your home, avoiding you costly infrastructure upgrades
- Get road-ready and set a priority charging status without tripping local power supplies

**OUR CHARGERS ARE COMPATIBLE WITH EVERY ELECTRIC VEHICLE MAKE AND MODEL.**

## INSTALLATION & ONBOARDING - LET'S HOOK YOU UP

### At-home requirements

- Our team will help you establish your at-home installation needs based on where you live, the position of your electrical board, and where you typically park your vehicle.

### At-home infrastructure review

- Complete our simple installation form to arm our installation team with the unique requirements of your home. Our team can arrange a pre-installation visit if we have any further questions or unknowns.

### At-home electrical design detail

- One of our dedicated installation partners will produce an at-home installation plan for your approval prior to install. You will sight and approve this plan on the day of installation.

### At-home installation planning

- Our team will confirm the date of your installation and cover off all of your pre installation questions.

### At-home support

- Our team provide ongoing maintenance and fault support. You can contact us by email or phone, anytime.

### Onboarding

- Following installation, you'll be directed through a quick and easy sign up process to create a personalised charging account with Thundergrid. Within your dashboard you can monitor usage, set your billing preferences, access our nationwide charging network.....and more!
